VMH GROUP

SURVEY MARKETPLACE & TRAFFIC ROUTER

Enterprise Multi-Client API Gateway • Version 3.4 Production

OFFICIAL SENIOR SOFTWARE DEVELOPER & SYSTEM OPERATOR MANUAL

VMH SMR Platform System Architecture & Operating SOP

Ye complete standard operating manual VMH Admin, Operations aur Engineering teams ke liye banaya gaya hai. Isme system architecture, MySQL 8.0 schema, Zamplia API sync, 910+ panel partners allotment, bulk survey assignment, single-click Reports Hub, S2S tracking callbacks, fraud security aur production maintenance ka poora process simple Hinglish me detail se samjhaya gaya hai.

LIVE PLATFORM URL

https://smr.vmhgroupsmr.com/

DEFAULT SUPER ADMIN

vmhgroup / Jelly (Role: Developer / Admin)

PRODUCTION DATACENTER

Hostinger Mumbai (srv2215.hstgr.io)

ACTIVE MYSQL DATABASE

u839355029_vmh_group (910+ Live Vendors)

1. System Architecture & High-Speed Flow

VMH SMR automated high-throughput marketplace aur router hai jo market research buyers aur supply panel vendors ke beech kaam karta hai:

> 💡 **Production Architecture Breakdown:**
>
> - **Client Layer:** React 18 + Vite SPA, Montserrat & Inter typography, responsive compact tables with sticky action buttons, hash-based URL routing (`#surveys`, `#reports`, `#vendors`).
> - **Core API Layer:** Native PHP 8.1+ LiteSpeed Gateway (`/api/index.php`) jo sub-5ms cURL proxy se Zamplia supply endpoints connect karta hai.
> - **Database Layer:** MySQL 8.0 (`u839355029_vmh_group`) hostinger server par permanent persistence provide karta hai with zero-mock data policy.
> - **Anti-Tamper Security:** Market Xcel SHA3-256 digital signature formula (`$hash = hash('sha3-256', $baseUrl . $secretKey)`).

2. Database Schema & Key Tables (MySQL)

Platform ke saare records real MySQL tables mein store hote hain:

TABLE NAME	PRIMARY COLUMNS	ROLE & DESCRIPTION
`users`	`id, name, username, email, password, role_id, is_active`	Portal admin accounts and employee logins.
`menu_permissions`	`id, user_id, menu_id, created_at`	Granular access controls mapping users to authorized menu IDs (1 to 10).
`vendors`	`id, vendor_name, vendor_code, rev_share, default_cpi, status`	910+ active panel partners with permanent RevShare percentage.
`vendor_allotments`	`id, project_id, vendor_id, vendor_cpi, quota_limit, complete_count`	Stores survey assignments, negotiated payout CPI, and entry links.
`leads`	`id, project_id, vendor_id, respondent_id, status_code, ip_address`	High-speed click tracking and status logging for every respondent session.
`payments`	`id, payment_id, vendor_id, amount, status, date`	Accounting ledger for vendor payouts (`Pending`, `Paid`, `Rejected`).
`log_table`	`id, row_id, table_name, action, data_array, ip_address, user_id`	Real-time security and audit logs tracking every DB update and login.

3. Authentication, RBAC & Granular Menu Permissions

Security ko maintain rakhne ke liye platform par multi-role RBAC active hai:

ROLE NAME	MENU PERMISSION ACCESS	OPERATIONS SCOPE
Developer	All Menus (1, 2, 3, 4, 5, 6, 7, 8, 9, 10)	Full root access, code deployment, database alterations, API keys.
Admin	Menus 1, 6, 7, 8, 9, 10	Operations management, survey allocation, vendor payout approvals.
User	Menus 1, 7, 8	Study inspection, link generation, live traffic monitoring.

4. Active Surveys Hub & Zamplia Supply Engine

Surveys Page (`#surveys`) par live studies available hoti hain. Table ke columns aur metrics:

FIELD NAME	MEANING (HINGLISH)	IDEAL RANGE	ADMIN ACTION
Checkbox	Multi-select checkbox	Multi-Select	10-15 surveys tick karke 1-click Bulk Assign karein.
Survey ID	Zamplia / MX unique study tracking number	e.g. `90142`	Vendor link banane aur client dispute audit me use hota hai.
CPI ($)	Cost Per Interview (Client kitna dollar pay karega)	$1.50 — $12.00+	High CPI surveys ko priority supply partners ko allotte karein.
LOI (Min)	Length of Interview (Survey kitna lamba hai)	8 — 15 Min	Chhota LOI (< 15 min) respondents jaldi complete karte hain.
IR (%)	Incidence Rate (100 me se kitne pass honge)	50% — 90%	High IR wale surveys me drop-off kam aur conversion rate high hota hai.
Capacity	Needed vs Completed Target	e.g. `600 / 340`	Capacity full hote hi routing automatically pause ho jaati hai.

🔘 **Row Action Controls:**

- **Assign (`Share2` Icon):** Single survey assignment modal kholta hai jaha vendor select karke customized tracking link generate hota hai.
- **Clone (`Copy` Icon):** Study setup ko replicate karke naya target study create karta hai.
- **Quotas Modal:** Sub-quota breakdown (Age, Gender, Region) dikhata hai ki kaunsa slot bhara hai aur kaunsa khali.
- **Quals Modal:** Pre-screener questions aur qualification conditions show karta hai.

5. Vendor Allotment & Bulk Survey Assignment (SOP)

Supply vendors ko studies allot karne ke liye 2 efficient methods provide kiye gaye hain:

1. **Single Survey Assignment:**
   Row ke **"Assign"** button par click karein ➔ Dropdown se vendor select karein (e.g. Rohan) ➔ Vendor RevShare (e.g. 60% = $1.80) auto-calculate ho jayega ➔ Quota limit daalein ➔ Click **"Generate Entry Link & Assign"**.

2. **Bulk Survey Assignment (10–15 Surveys at Once):**
   Surveys table ke start me bane **Checkboxes** se 10 se 15 surveys tick karein ➔ Top table bar me **"Bulk Assign to Vendor"** button dabayein ➔ Vendor pick karein ➔ 1 click me saare studies MySQL `vendor_allotments` me allocate ho jayenge aur tracking links ki CSV download ho jayegi.

🔗 **Generated Universal Entry Link Anatomy:**

```
https://smr.vmhgroupsmr.com/r.php?v=VND_ROHAN&sid=90142&rid=[RESPONDENT_ID]
```

* `v` = Vendor Code (Rohan / PureSpectrum / Dynata)
* `sid` = Survey Study ID
* `rid` = Respondent ID Placeholder (Supports: `[RESPONDENT_ID]`, `[UID]`, `[#UID#]`, `vmhgroupss`, `[RID]`)

6. Supply Partners Hub (910+ Vendors) & RevShare Persistence

Vendors tab (`#vendors`) me system ke 910+ active panel partners live database se fetch hote hain:

A. **Instant Search:**
   Search bar me vendor name ya vendor code type karein; 910 vendors sub-millisecond me filter ho jaate hain.

B. **RevShare Edit & Permanent MySQL Persistence:**
   Jab kisi vendor (e.g. Rohan) ka RevShare 70% se badalkar **60%** karke Save dabate hain, to frontend direct authenticated API request bhejta hai jo MySQL `vendors` table me `UPDATE vendors SET rev_share = 60.00 WHERE id = 12` execute karta hai. Page refresh karein ya browser restart karein, RevShare permanently 60% hi save rehta hai.

7. Consolidated Single-Click Reports Hub

Pehele reports ke liye 5 alag tabs click karne padte the. Ab **Reports Hub (`#reports`)** single consolidated view me live hai:

📊 **Comprehensive "View Details" Modal Drilldown:**

- **Study Details:** Survey ID, Project Name, Country, Client CPI, Status.
- **Vendor Allotment List:** Kis-kis vendor ko study di gayi hai aur unka individual quota.
- **Delivered Completes vs Target:** Har vendor ne kitne actual completes deliver kiye.
- **Financial Margins:** Gross Client Billed, Vendor Payable, aur Net VMH Profit Margin real-time calculate hota hai.
- **Pacing Meter:** Dynamic progress bar jo show karta hai survey kitna percent complete hua hai.

8. Traffic Router & S2S Postbacks (4 Status Codes)

Incoming respondents `/r.php` se enter hote hain aur survey complete hone par client system 4 postback signals return karta hai:

STATUS CODE	SIGNAL TYPE	OUTCOME (NATEEJA)	SYSTEM ACTION & FINANCIAL SETTLEMENT
1 / 10	COMPLETE	Survey successfully verified ✅	Vendor S2S Complete URL fire hota hai. Vendor ko payout credit, VMH revenue confirm.
2 / 20	TERMINATE	Demographic / criteria screenout ❌	Vendor Terminate URL return hota hai. Koi financial penalty nahi.
3 / 30	OVERQUOTA	Target slots pehle hi full ho chuke the ⚠️	Agar router enabled hai, to respondent ko instant doosre live survey me route kiya jata hai.
4 / 40	SECURITY	Fraud, VPN, Bot, Speeder pakda gaya 🚫	Session terminated, IP blacklisted, 0 payout.

9. Multi-Layer Fraud Security & Device Fingerprint

🛡️ **4 Active Security Shields:**

- **1. IP Quality Score & Datacenter VPN Shield:** AWS, DigitalOcean, commercial proxies aur VPNs ko entry gate par hi drop kar deta hai.
- **2. Device Fingerprinting:** HTML5 Canvas, WebGL renderer aur screen resolution scan karke unique hardware hash banata hai taaki duplicate entries block ho sakein.
- **3. Speeder Detection Engine:** Survey ka minimum duration check karta hai (e.g. 15 min survey in 2 min = Auto Fraud Terminate).
- **4. Honeypot Traps:** Bot spiders ko pakadne ke liye hidden trap fields use karta hai.

10. Browser History & Deep Linking SOP

- **URL Hash Routing:** Pages standard hash URLs (`#surveys`, `#reports`, `#vendors`, `#payments`) follow karte hain. Page refresh (F5) karne par aap bilkul usi page aur state par rahenge.
- **Modal Back-Button Interception:** Jab koi popup (Details, Assign Modal, Quotas) open ho, to browser ka Back button dabane par poora page refresh hone ke bajaye sirf modal smoothly close hota hai aur screen scroll wahi rehta hai.

11. DevOps & Production Deployment Pipeline

🚀 **1-Click Production Deployment Procedure:**

```
# 1. Compile React 18 production bundle cd "c:\Users\shri hari computer\Downloads\smr1\client" npm ru
n build # 2. Deploy to Hostinger Production Server (smr_v2 & api) cd "c:\Users\shri hari computer\Dow
nloads\smr1" python "C:\Users\shri hari computer\.gemini\antigravity\brain\84f23ed8-58fe-4431-82c6-cc
606978dd1d\scratch\deploy_smr_frontend.py" # 3. Synchronize Git Version Control git add . git commit
-m "Deployment update" git push origin main
```
