VMH GROUP

SURVEY MARKETPLACE & TRAFFIC ROUTER

Enterprise Multi-Client API Gateway • Version 3.4 Production

OFFICIAL ADMIN OPERATING MANUAL (SOP)

VMH SMR Platform Complete Admin Guide

Ye handbook VMH Admin aur Operations team ke liye banayi gayi hai. Isme login, daily routine, high-yield surveys, supply vendors ko link dena, S2S tracking aur fraud security ka poora process simple Hinglish me step-by-step explain kiya gaya hai.

LIVE PLATFORM URL

client-ten-lyart-71.vercel.app

DEFAULT SUPER ADMIN

Vmhgroup / Jelly

PRIMARY DATACENTER

Hostinger Mumbai (31.97.2.35)

INTEGRATED CORE APIS

Zamplia Supply & Demand, Market Xcel, Google Sheets

1. Platform Architecture & Business Model

VMH SMR ek automated marketplace aur traffic router hai jo market research buyers aur respondents ke beech kaam karta hai:

💡 **Business Revenue Flow (Paise Kaise Bante Hain):**

- **Demand Side (Clients):** Zamplia, Market Xcel, Dynata, Cint jaise bade buyers surveys provide karte hain (e.g. CPI **$3.00**).
- **Supply Side (Vendors):** Panel partners aur traffic networks respondents deliver karte hain (e.g. Vendor Payout **$1.80**).
- **VMH SMR Margin:** Har successful complete par VMH ka net profit hota hai (e.g. **$1.20** per interview).
- **Smart Router:** Respondent jab link par click karta hai, router uski profile scan karke sabse high-paying survey me automatically bhejta hai taaki screenout rate minimum ho.

2. Admin Login & Authentication Security

Platform enterprise-grade RBAC (Role Based Access Control) se secured hai:

Portal URL	Username	Password	Role	Database Audit
Live Vercel / Hostinger	`Vmhgroup`	`Jelly`	Super Admin	Auto-logged in Google Sheet (`Admins` tab) with timestamp

⚠️ **Security Note for Admin:**

- Sirf authorized **Admin** accounts hi dashboard access kar sakte hain. General users ya unauthorized logins automatically block ho jaate hain.
- Login credentials badalna ho to Google Sheet ke `Admins` tab me jakar update kiya ja sakta hai.

3. Daily 5-Minute Morning SOP (Subah Ka Kaam)

Har subah dashboard open karte hi Admin ko bas ye 3 quick steps lene hote hain:

1. **Step 1: KPI Cards Check Karein**
   Dashboard par **Sessions**, **Goal Completions**, aur **Bounce Rate (Avg CPI)** dekhein ki raat bhar me kitna traffic deliver hua.

2. **Step 2: "Sync Zamplia" Button Dabayein**

Top navigation bar me neela **"Sync Zamplia"** button click karein. Ye 1 second me Zamplia Supply API se nayi inventory, live quotas aur updated CPI sync kar leta hai.

3 **Step 3: Top Picks Se High-Yield Links Nikalein**

Sidebar me **Top Picks** tab kholein. Rank 1 se 5 wale surveys ka CPI sabse high ($4.50 - $11.50) hota hai. Inke links copy karke apne top vendors ko share karein.

4. Allocated Surveys & Metrics Samajhna

Sidebar me **"Live Surveys"** kholein. Yaha 626+ live surveys ki inventory dikhti hai. Har row me 5 important columns hote hain:

Field Name	Meaning (Hinglish)	Ideal Range	Admin Action
Survey ID	Zamplia / MX ka unique tracking number	e.g. `90142`	Vendor link banane aur dispute audit me use karein.
CPI ($)	Cost Per Interview (Client kitna pay karega)	$1.50 — $12.00+	High CPI surveys ko priority dein.
LOI (Min)	Length of Interview (Survey kitna lamba hai)	8 — 18 Min	Chhota LOI (< 15 min) respondents jaldi complete karte hain.
IR (%)	Incidence Rate (100 me se kitne pass honge)	50% — 90%	High IR wale surveys me drop-off kam hota hai.
Capacity	Total Needed vs Completes Left	e.g. `600 / 340`	Capacity full hote hi routing automatically pause ho jaati hai.

🔘 **Survey Table Ke 3 Main Action Buttons:**

- **Quotas Modal:** Ispe click karke dekhein ki survey me kaunsa quota baaki hai (jaise Age 25-34 full hai ya khali, Gender Female open hai ya nahi).
- **Quals Modal:** Pre-screening requirements dikhata hai (jaise Job Title = IT Manager, Household Income > $50k).
- **Assign Vendor:** Modal khul kar kisi specific vendor ke liye instant direct tracking link generate karta hai.

5. Top Picks (Algorithm-Ranked Surveys)

Sidebar me **"Top Picks"** tab VMH ke custom yield algorithm dwara rank kiya jata hai:

- **Rank 1 to 5:** Sabse high priority — Maximum CPI + High IR + Short LOI.
- **Priority Score (e.g. 98.4%):** Higher score = Highest probability of quick money & maximum conversion.
- **Strategy:** Jab bhi kisi vendor ka naya sample batch aaye, hamesha Top Picks se shuru karein.

6. Supply Vendors & Entry Link Generator

Sidebar ➔ **"Supply Vendors"** me traffic partners (Dynata, PureSpectrum, Cint, VMH Panel) manage kiye jaate hain.

A **Naya Vendor Add Karna:**
"Add Vendor" par click karke Vendor Name, Vendor Code (e.g. `VND_DYNATA`) aur payout share set karein.

B **Vendor Entry Link Ka Structure:**
System automatic dynamic URL produce karta hai jo vendor ko diya jata hai:

```
https://api.vmhgroupsmr.com/router/entry?v=VND_01&sid=90142&rid=[VENDOR_RESPONDENT_ID]
```

* `v` = Vendor Code
* `sid` = Survey ID (optional - agar specific survey me direct inject karna ho)
* `rid` = Vendor ka placeholder (Vendor apne system se respondent ID pass karega)

7. Demand Clients & S2S Postbacks (Status Codes)

Sidebar ➔ **"Demand Clients"** me survey buyers configure hote hain. Har interview ke end me client 4 status signals bhejta hai:

Status Code	Client Callback Type	Outcome (Nateeja)	Vendor Postback Action
status=1	**Complete**	Survey successfully pura hua ✅	Vendor ko payout credit hota hai. VMH revenue confirm.
status=2	**Terminate**	Profile qualify nahi hui (Screenout) ❌	Vendor ko return bhej diya jata hai. Koi penalty nahi.
status=3	**Overquota**	Target slots pehle hi bhar chuke the ⚠️	Router respondent ko doosre matching survey me bhej deta hai.
status=4	**Security Block**	Fraud, VPN, Bot ya duplicate pakda gaya 🚫	IP blacklisted. 0 payout.

8. Multi-Layer Fraud Prevention Engine

Sidebar ➔ **"Fraud Security"** tab. VMH SMR client rejections ko zero karne ke liye 4 security shields use karta hai:

🛡️ **4 Active Security Layers:**

- **1. IP Quality Score & VPN Shield:** Datacenter IPs, NordVPN, ExpressVPN, Proxy aur Tor nodes ko entry point par hi drop kar deta hai.
- **2. Device Fingerprinting:** Browser Canvas, WebGL aur screen hash scan karta hai taaki ek hi respondent bar-bar alag naam se survey na kare.
- **3. Speeder Detection Engine:** Agar 14 minute ka survey kisi respondent ne 2 minute me submit kiya, to system use instantly terminate kar deta hai.
- **4. Honeypot Trap Questions:** Bot spiders ko identify karke auto-ban karta hai.

9. Zamplia Reconciliation & Monthly Invoicing

Sidebar ➔ **"Reconciliation"** tab. Month-end me accounting aur billing ke liye:

1. **Date Range Select Karein:**
   Current month ki Start Date (e.g. 1st) aur End Date (e.g. 30th) select karein.
2. **"Fetch Reconciliation" Click Karein:**
   System Zamplia server se verified completes fetch karega aur table me display karega.
3. **1-Click Export CSV:**
   "Export CSV" button dabayein — aapki team ke liye verified payout invoice sheet download ho jayegi.

10. Golden Rules & Troubleshooting FAQ

🌟 **3 Golden Rules For 100% Success:**

- **Rule 1:** Hamesha subah **Sync Zamplia** karein taaki fresh high-budget surveys active ho jayein.
- **Rule 2:** Kisi survey ka quota agar 90% se jyada ho, to traffic thoda slow karein taaki overquota screenouts na aayein.
- **Rule 3:** Weekly reconciliation check karein taaki month-end par koi mismatch ya payment dispute na ho.
